-
- Fast checkout.**
 - Flexible meal plans.**
 - Accurate food recognition.**

Vision is the most accurate and flexible way to recognize articles.
That's why we've used AI-based computer vision to build the vision**checkout** – a self-checkout for the future.

No more lines

The vision**checkout** detects articles in half a second, so your customers can spend more time enjoying their lunch instead of standing in line.

Higher staff efficiency

Bring your service to the next level with the vision**checkout** by deploying your staff where it creates customer value.

(<https://auvisus.com/en/>)

Easy to integrate

Simply add the **visioncheckout** to your POS and keep established processes and systems in place. For further information on the integration click here (<https://auvisus.com/en/integration/>).

A fast and customer-friendly checkout is a vital objective of our service. We were convinced by the concept and implementation of image recognition technology at our facility. With this innovation auvisus will shape the future of gastronomy.
